

Name: Copper foil tape adhesive

Color: copper

Material: Copper, conducting glue, Abscission layer paper

Size: 10mm (Width)* 0.065mm(thickness)*25m(length)

Withstand temperature: -10°C~ 125°C

Product Description:

Conductive copper tape is made of the high-quality rubber and copper material.

Good viscosity, becomes strong paste, good conductivity.

Magnetic, anti-static, radiation protection, cold resistance, electromagnetic shielding.

Application: Transformers, mobile phones, computers, PDS's, PDP, LCD displays, Styles pens.
