KONTAKT GOLD 2000

FUNCTIONAL PROTECTION FOR ALL METAL-PLATED CONTACTS

KONTAKT GOLD 2000 is a synthetic-based, medium viscosity lubricant, leaving a thin film.

It gives long-lasting lubrication to connectors and other electromechanical contacts.

It reduces wear on the contact surfaces and reduces damage.

FEATURES	APPLICATIONS
<ul style="list-style-type: none"> Has a very low surface tension, which ensures that the active film is evenly distributed over the metal, penetrating into inaccessible spots and guaranteeing effective protection. Can be used to significantly improve the reliability of installations and equipment in harsh industrial environments. Should be used regularly, particularly where parts are subjected to frequent physical handling, in order to avoid interruptions and data loss. Reduces operating costs considerably. 	<ul style="list-style-type: none"> Particularly suited to connectors with the following contact surfaces : <ul style="list-style-type: none"> - Gold, Silver, Tin, Rhodium, Palladium, Other metal-plated Can be used in : <ul style="list-style-type: none"> - Communications engineering - Car electronics - Computer technology - Office equipment - Industrial electronics - Military technology

Color :	colorless
Density at 20 °C :	0,77 g/cm ³
Viscosity active product :	
@ 20°C :	2000 mm ² /s
@ 40°C :	260 mm ² /s
@ 50°C :	114 mm ² /s
@ 100°C :	12,5 mm ² /s
