

5V DC Dual Power Relay Module with Optocoupler

Module: MD0004 / 180602

Product Description:

5V DC Dual Power Relay Module

- Easy to interface to Arduino or other microcontroller
- Easy to connect to load
- Opto-isolated

Specification:

- Dual relays, active low
- Rated load: 10A 250VAC/28VDC, 10A 125VAC/28VDC, 10A 125VAC/28VDC
- Electrical life: 100,000
- Mechanical life: 10,000,000
- Coil rated voltage: 3-48VDC
- Coil power: 0.36W, 0.45W
- Coil drop-out voltage: $\geq 10\%$
- Ambient temperature: -25 degrees Celsius to +70 degrees Celsius
- Output: A-K
- 5V to be supplier, not from the Arduino's 5V output pin.
