

927-I Adjustable temperature soldering table welder

Features:

- 60w adjustable temperature soldering iron station with solder roll holder, removable solder collector, brass tip cleaner, blue sponge
- Rapid warming design: 60 watts of power provides rapid rising temperatures. Fast and efficient heating suitable for lead and lead-free solders, just like champions!
- Adjustable and stable temperature: The unit is equipped with a temperature control knob. The temperature range is 200 ° C-480 °C/392 ° F-896 °F.
- Includes many useful welding accessories: removable and easy-to-clean solder collectors, stainless steel racks, removable solder wire racks, cleaning sponges and suction head cleaners
- Safer pads & Eco-friendly materials: The pads are equipped with a master switch for increased safety.
- Easy to replace heating elements: Use externally heated soldering irons, whose heating elements are easy to replace.

Specifications:

- Model: WEP 927-I
- Iron power: 60W
- Temperature range: 200 °C-480 °C
- Soldering iron temperature stability: ± 2 °C (static)
- Operating environment: 32 °F to 104 °F/ 0 °C to 40 °C
- Product size: 150 cm X 100 cm X 48 cm \pm 5 mm

What's in the box?

- WEP 927-I Portable 60w temperature adjustable electronic welding table 1pc
- Lead-free tip (this has been inserted into the soldering iron) 1pc
- Stainless steel soldering iron holder (it provides a safe way to set the iron aside while it is still hot) 1pc
- Removable solder collector 1pc
- Removable wire holder 1pc
- Iron head cleaner (including copper wire cleaning ball) 1pc
- Cleaning sponge 1pc
